Ex 1/2 "like" a house. Some however of other than residents are  
- "like" an office or HQ or etc. in a converted dwelling  
place. Sense of being brownish-grey stone construction  
on a slight elevation above a street curving around  
slight slope contour with fence around it & steps  
leading to a door. 2 floors - other parts to  
structures. Internal activities are not visible  
to this level. It's "like" it's part of a large  
federation/organization/agency - group of people bound  
by common purpose & goal but more constraints  
than just voluntary
